

Creating healthy spaces

Liniuswood®

Aesthetic sun protection and façade decoration

Introduction

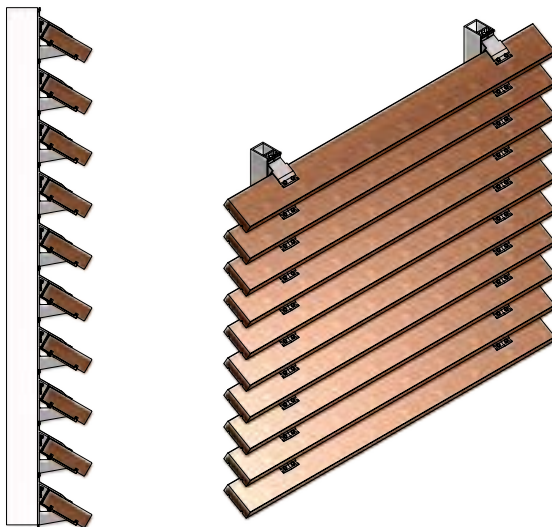

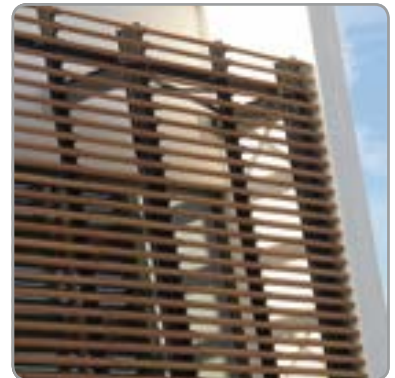

Lininuswood® is a unique, patented concept which combines the quality of aluminium and the natural characteristics of timber in an aesthetic and contemporary system.

Technical features

- Blade type LW.01
 - Wood type: WR Cedar
 - Depth x height: 85 x 27mm
 - Pitch: 90mm (variable, greater pitch possible)
 - Slope: 60°
- Blade support LW.11
 - Material: POM - UV-resistant (black or grey)
- Supporting profile
 - Sunclips® mullions SD.014 / SD.054 / SD.100, in aluminium, anodised or powder-coated

Unique features

- Aesthetic and sturdy contemporary concept:
 - Mullions in aluminium - guarantee good dimensional stability of the whole unit
 - Blades in timber - lend the façade decoration a very natural and elegant appearance
- Simple and time-saving installation by means of clip assembly (blades can be removed, if necessary)
- Continuous, linear line of blades over each straight blade pitch - thanks to the clip fixation
- Controlled warping of the wooden blade within the clip system
- Low-maintenance: high-quality timber, suitable for natural ageing
